Assembly instructions

Aqua One®

Step One:

- Insert the 12 screws into their respective holes in the 2 side panels.
- Insert the 12 cams into the larger holes in the upper & lower support panels & the 2 shelves. Make sure that the arrow points towards the hole for the corresponding screws. Now slot the upper panel onto the top screw of the left side panel. Repeat this with the 2 shelves & the lower support panel.

Side panels 1 & 6 and 12 x a

upper support panel 2, lower support panel 5
shelves 3 & 4 and 12 x b

Step Two:

- Now attach the right side panel to the other side of the upper & lower support panels & the 2 shelves. Then fasten the cams by turning them clockwise so that they hold in position.

Attach panels 2,3,4 & 5 to panel 1

Attach side panel 6

Step 3:

- Now you can fasten the base panel. Once secured, screw in the 4 feet to the base panel. **Tip**, Ensure that the cams of the shelves point towards the base.

Bottom panel 7 and 5 x c

Attach 4 feet to panel 7 and 4 x d

Step 4:

- Now carefully turn the cabinet over so that it sits on its feet. You can now attach the top panel to complete the cabinet. **Tip**, Before you install the top panel, decide which side of the cabinet you would like to be the front. Then install the top with the logo facing that front.

Top panel 8 and 5 x c

Step 5:

- Once the cabinet is complete you can now place the Aquarium tank on top of it. Now take the two glass panels & the two plastic sliders. Slot the plastic sliders on to either end of the glass panels. Now slot the plastic sliders on to the aquarium tank.

Step 6:

- Attach the filter, hang over the side of the tank, where there is a gap cut into one of the glass panels.

Step 7:

- You can now attach the hood, which will clip on to the top of the plastic sliders.
